DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 8-10, 14, 16, 18-21 and 23-27 are rejected under 35 U.S.C. 102(b) as being anticipated by Barvaeus. Barvaeus shows the use of a shell (3) having a plurality of vertically extending members (2) integrally formed (when assembled) therein mounted on a frame (1). Barvaeus further shows that the vertically extending members are adjustable by moving a bottom portion thereof upwardly. (see Figure 3).

Response to Arguments

In response to applicant's arguments that in claim 1, *that the applicant has specified that "the vertically extending members support the back of a person without engaging any structural member positioned behind the vertically extending members"*, the examiner is of the position that Barvaeus does in fact anticipate applicant's claimed invention. The vertically extending members as taught by Barvaeus do in fact support a user's back without engaging any structural member at a rear portion thereof. The vertically extending members are only received within a pocket of mounting member or shell (3) **in order to be indirectly supported** on a frame or backing member (1). Applicant has taught that the vertically extending members of the claimed invention are attached to a shell (24) at a top portion thereof which is supported by the frame and

the vertically extending members therefore, **are indirectly supported** by the frame or backing member (22).

In response to applicant's arguments that it is specified "*in claim 14...without engaging a supplemental support member*", the examiner is of the position, so far as defined by the claim the vertically extending members do in fact support a longitudinal section of at least the lumbar region of a person "without engaging a supplemental support" placed in front of the vertically support members or at a top portion thereof. Applicant should note again, the vertically extending members of the claimed invention are in fact supported by the shell at a top portion thereof and consequently is indirectly supported by the frame at a rear portion thereof.

Conclusion

2. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
